

The FY 2000/2001 all funds budget totals \$337.3 million. This represents an increase of approximately \$6.3 million or 1.9% more than the FY 1999/2000 budget. This summary describes the budget by fund type.

GENERAL FUND

Overall, the General Fund revenue projection, including all sources, is an increase of \$7.9 million or 4.6% over the adopted FY 1999/2000 budget. The following table summarizes the revenue picture:

REVENUE SUMMARY

	FY 1999/2000	FY 1999/2000	FY
			2000/2001
<u>Resources Available</u>	<u>Original</u>	<u>Estimated</u>	<u>Adopted</u>
	<u>Budget</u>	<u>Actual</u>	<u>Budget</u>
Ad Valorem Taxes - Operating	\$ 56,341,621	56,629,000	61,908,270

Transfers	300,000	1,811,445	368,695
Total Resources Available	\$ 170,779,901	174,629,567	178,741,386

Ad Valorem Taxes – The adopted ad valorem or property tax millage rate for operating purposes is 5.0415 compared to the previous operating millage rate of 4.9574. In addition to the property tax levied for operating purposes, property taxes also include a separate debt levy which is used to pay debt service costs (principal and interest payments) on outstanding General Obligation (G.O.) Bonds. The current outstanding debt issues are 1987 bonds which were refunded in 1992 and again in 1998. Debt service for that issue will be \$3,933,425 in FY 2000/2001 which will require a levy of \$3,817,454 and a millage rate of 0.2968 compared to the previous millage rate of 0.3549. The 1997 bond issue requires a debt service payment in

FY 2000/2001 of \$2,879,143 which requires a gross levy of \$2,933,832 and a millage rate of 0.2281 compared to the previous millage rate of 0.2541. The combined millage rate for operating and debt service for Fiscal Year 2000/2001 is 5.5664, which amounts to no change in the rate.

Property taxes from the debt levy are shown as revenue to the General Fund and then transferred to the debt service fund. Accordingly, transfers from the General Fund to the debt service fund are in the amount of \$6,454,196 which assumes a 95 percent collection rate as well as receipt of some delinquent taxes from prior years. To the extent the City receives any delinquent payments for 1977 bonds that were retired last year, the payments will be applied to current G.O. debt service obligations.

The operating property tax rate is restricted to no more than 10 mills (\$10 per \$1,000 of taxable value) for municipalities. Adoption of any increase in the total levy beyond new construction or annexation is required to reference the rolled-back rate, which is the rate necessary to generate the same taxes as were received in the prior year. The City's rolled-back rate for FY 2000/2001 is 4.6619. Compared to this rolled-back rate, the proposed rate is an 8.14 percent increase. The increase in the total rate is 6.34% over rolled-back. As described in the City Manager's Budget Message, the dollar impact to the average homeowner in Fort Lauderdale is \$22.54. The "Save Our Homes" State Constitutional amendment limits the increase in assessed value to the Consumer Price Index. For this year, the limit is 2.7 percent. The limit essentially shifts the tax burden from residential property to non-residential property.

Impact of Property Tax Rates on Average Homeowner

Following is a comparison of current millage rates for Broward County taxing jurisdictions as well as larger Florida cities.

Adopted Operating Millage Rates for FY 2000/2001

<u>Jurisdiction</u>	<u>Millage</u>	<u>Percentage</u>
Broward County Schools	8.5410	35.0%
Broward County	7.5250	30.8%
Fort Lauderdale	5.0415	20.6%
North Broward Hospital	2.4803	10.2%
S. Florida Water Mgmt.	0.6970	2.9%
Hillsboro Inlet District	0.1038	0.4%
Florida Inland Navigation	<u>0.0410</u>	<u>0.2%</u>
	24.4296	100.0%

**FY 2000/2001 Operating Millage Rates as Adopted per \$1,000
Of Taxable Value for the Top 10 Florida Cities over 100,000 Population**

<u>City</u>	<u>FY 2000/2001 Millage</u>
Jacksonville*	10.5732
Miami	8.9950
Hialeah	7.5280
Miami Beach	7.3990
St. Petersburg	7.2903
Tampa	6.5390
Hollywood	6.2999
Orlando	6.0666
Clearwater	5.5032
Fort Lauderdale	5.0415
Tallahassee**	3.2000

*Jacksonville, which is consolidated with Duval County, may levy up to \$20 per \$1,000 of value.

**Tallahassee operates its own power company. Revenues from that operation heavily subsidize their general fund.

The following graph shows how closely property projections and actual collections have matched up, which attests to the City's ability to forecast reliable projections.

Franchise Fees - Franchise fees are payments made by utility companies for the privilege of constructing upon and operating within property owned by the City. The basis for the fees is provided for in long-term agreements, which do not expire for several years. Florida Power and Light (FPL), which is projected to pay 78 percent of the \$12,800,000 estimated, remits 6 percent of its gross revenue derived from accounts within the City limits, less property tax and minor fees previously paid to the City. Other franchise fee payers include People's Gas, BellSouth, and Comcast Cable Television. The projection for FY 2000/2001 reflects less than a one percent increase from the current year's budget due mainly to the sluggish trend decline in FPL revenue.

Utility Taxes - The City levies a 10 percent utility tax on electric, gas, and water utility bills for customers within the City. The telecommunications rate is 7 percent. As with franchise fees, FPL is the largest taxpayer comprising 47 percent of the total amount projected. This revenue source has also been impacted by the FPL slowdown and the fact that the growth in telecommunications has reached a plateau after several years of tremendous growth. Effective October 1, 2001, the new local communications service taxes will automatically become effective in Florida municipalities, including Fort Lauderdale, at rates developed using local government and industry data. The new taxes will replace the utility tax on telecommunications, franchise fees on cable and telecommunications service providers, and permit fees relating to placing or maintaining telecommunications facilities in rights-of-way.

Charges for Services - This revenue is associated with revenue received from users of specific services. These services include user fees for police, building inspection, planning, and docks as well as parks and recreation. The revenue projected for FY 2000/2001 is anticipated to rebound after this category peaked in FY 1998/99 with reimbursement from Broward County for police dispatch but dropped in FY 1999/2000 with write-offs of County receivables, subject to City Commission approval.

License and Permit Fees - License and permit fees include occupational licenses issued to authorize businesses to operate within the City limits, and development permits issued to authorize building and construction within the City limits. While the occupational license revenue is fairly static, the development permits reflect the strong economic conditions and the market demand for office, retail, and residential construction. The permit revenue is projected to remain stable from the FY 1999/2000 original budget estimates for this fiscal year. Generally, the projections have tended to be conservative with actuals exceeding projections.

Intergovernmental Revenue - This revenue source is comprised of recurring State and County-shared revenue. The State of Florida shares motor fuel, alcoholic beverage license, cigarette, and sales tax revenue with local government on the basis of population. Broward County provides gasoline and occupational license revenue. There are no major changes in this revenue category as the City's share of State revenue declines are offset by some increases in the total funds available. A future change is the replacement of cigarette taxes with a corresponding increase in sales tax.

Fines and Forfeitures - This revenue category includes fines for traffic and other City Code violations. The revenue source has been stable but not growing. The revenue represents only one percent of all General Fund resources.

Miscellaneous Revenue - This revenue source includes interest earnings, rents, the special assessment for fire-rescue, and interfund charges. The significant change is the planned five percent increase in the special assessment. The fee is levied to recover a portion of the costs for fire-rescue services. Due to a recent court ruling, emergency medical services are ineligible expenses for recovery from such a special assessment.

Non-Revenues - Non-revenues consist of working capital reserve, prior year balance, and transfers from other funds. The working capital reserve was created in FY 1993/1994 to provide additional protection against economic downturns. The prior year balance represents available funds from the current year to fund next year's budget. The FY 1999/2000 amount differs from the budgeted amount in that the estimate reflects encumbrances incurred in the previous year which were outstanding at September 30, 1999 as well as any additional balance available after the final audit of the previous fiscal year.

GENERAL FUND

Program highlights include:

Administrative Services - This budget reflects a reorganization within the Information Technology Division (formerly Information Systems), \$100,000 for debt service to borrow funds for a Personnel Imaging System, \$100,000 for e-commerce applications, continued funding of the Geographic Information System Coordinator to CIP, and additional funding for personnel recruitment efforts due to the tight labor market. A temporary Personnel Assistant has been converted to permanent status and a Clerk II position has been eliminated.

City Attorney's Office - This budget includes no additional funding requests.

City Clerk - Due to the deletion of the tri-annual City elections, the adopted budget has been reduced by \$86,000. An additional Administrative Assistant (for a net cost of \$40,000) has been added to provide professional assistance to the Commission on special projects.

City Manager's Office - An Assistant to the City Manager position was transferred to the Community & Economic Development Department and reallocated to an Economic Development Representative. The Equal Opportunity Office received an additional \$33,000 in funding for increased office space rental and managerial training and materials. A temporary Administrative Aide in Public Information has been converted to permanent status.

Community & Economic Development - Additional funding has been included for demolitions (\$100,000) and boardups (\$70,000) with offsetting revenues of \$50,000 and \$42,000 respectively. Another \$15,000 was added for a Special Master to conduct trash related hearings, with a revenue offset of \$40,000. The full year's cost of two new Code Compliance Officers that were added during FY1999/2000 is reflected, with one third of the cost coming from the Community Redevelopment Agency. An additional position has been transferred into this department from the City Manager's Office and reallocated to an Economic Development Representative. Four existing vacancies have been deleted: a Planner II, a Building Inspector in Code, a temporary Administrative Assistant, and a temporary Planning Assistant.

Fire-Rescue - The budget includes an additional \$100,000 for overtime, \$99,500 for three new Communication Specialist Trainees, \$55,500 for vaccinations and medical testing, and \$58,000 for retiree health benefits. A vacant Emergency Operations Manager position was deleted.

Finance - This budget reflects the full year's cost of an Accountant position that was filled midway through last year.

Parks and Recreation - Resources have been appropriated for several areas that have been under funded for several years totaling approximately \$1.3 million dollars. This includes areas such as part time beach and International Swimming Hall of Fame lifeguards; vehicle O&M and radio shop charges; overtime for Parks Services, Oriole Stadium, and Beach Patrol; Carter Park, recreation centers maintenance, and teen programming; water and horticultural supplies; part time salaries; trash removal; and building repair and maintenance at the stadium. Another \$500,000 was added for maintenance and operation costs of several new parks bond projects that will be completed in FY 2000/2001. Included in these dollar amounts is the addition of thirteen positions. Also, eighteen temporary positions have been converted to permanent status. Two vacant Apprentice Maintenance Workers were deleted.

Police - The adopted budget includes \$264,000 for the CAD/RMS maintenance costs as well as \$158,500 for Netview software, server and one backup. Over \$600,000 was added to assume the funding for various grant programs that ended, resulting in the transfer of ten positions from grants to the General Fund. Overtime was increased by \$400,000, recruiting costs by \$35,000 and standby pay by \$60,000. A vacant Clerk II and a vacant Crime Analyst were deleted.

Public Services - Due to the new parks bond projects coming on line, three new maintenance positions will be added in January, 2001, for a total of \$176,500 including equipment and operating costs. The One-Stop Shop will outsource plans review to Broward County to provide expedited customer service at a cost of \$50,000 which will be fully offset by revenue.

Other General Government - This category includes items that are not attributable to City departments. Funding is provided for various social service, cultural, and promotional organizations in the community. The Community Services Board has evaluated the social and cultural applications for this funding and the Economic Development Advisory Board has reviewed the promotional proposals. This budget also includes funding for City mission related expenditures.

Contingencies - This appropriation is designed to cover expenditures not anticipated at the time of budget adoption. The adopted funding level also includes an amount for potential contract settlements for all three unions, as well as cost-of-living adjustments for management and confidential employees. These compensation increases will be spread to the respective departments once union negotiations are completed.

Transfers - A transfer is an interfund transaction. Transfers out of the General Fund include resources for debt service (principal and interest) payments, contributions to the capital improvement program, and grant matching dollars.

Grant Matching Funds		724,000	677,236	200,000
Parking Fund		224,948	224,948	138,284
Total Transfers Out	\$	<u>15,434,245</u>	<u>16,013,487</u>	<u>15,439,695</u>

Year-End Balance/Working Capital - Savings in the current fiscal year (revenues minus expenditures) represent a significant resource for funding future budgetary requirements. The City has traditionally appropriated all identified resources for service delivery except for working capital reserve.

SANITATION FUND

The Sanitation Fund provides the City with refuse collection, a trash transfer station, lot clearing, bulk trash collections, recycling and street cleaning services. In early FY 1998/1999 we proceeded with enhancing our level of service in this program by providing once a week yard waste cart service to our customers. This enhanced level of service has resulted in the twice-monthly bulk service to be adjusted to once a month. In addition, we have reduced the size of the refuse containers to encourage recycling. These new service levels are working well.

Remediation of the old Wingate Landfill and Incinerator site is proceeding and based on the agreements between the City, the other Potential Responsible Parties and EPA, it should be able to be financed with the 6% rate increase approved by the City Commission for this purpose in April 1995.

The FY 2000/2001 budget for Sanitation is \$17,334,292 an increase of \$685,446 or 4.1% from the FY 1999/2000 budget. This increase results primarily from an increase in operational costs as well as additional refuse carts and recycling bins for newly annexed areas and an additional Cart Shop service truck. To offset these costs a rate increase of 2 percent is effective October 1, 2000. The impact of this increase is illustrated below:

2% Effect on Sanitation Rates

<u>Category</u>	<u>FY 1999/2000</u>	<u>FY 2000/2001</u>	<u>Increase/month</u>
Single-Family Home	\$28.40	\$28.95	\$0.55
Multi-Unit Dwelling	26.11	26.62	0.51
Commercial Account	39.36	40.13	0.77

WATER AND SEWER FUND

The City of Fort Lauderdale supplies water and sewer services on a regional basis for over 300,000 residents of central Broward County. Areas serviced by the City's water treatment and distribution system include Fort Lauderdale, Port Everglades, Sea Ranch Lakes, Lauderdale-by-the-Sea, Oakland Park, Wilton Manors, Davie, Tamarac and portions of unincorporated Broward County.

The total FY 2000/2001 operating budget for the Water and Sewer Fund is \$34,134,301, an increase of \$621,064 or 1.9% above the FY 1999/2000 budget. The increase is due to a new supervisor position in Customer Service, additional funding for components and parts as we move to a preventative form of maintenance from a reactive form, as well as small increases in general operating costs. Water and Sewer Fund revenues are sufficient to meet operational commitments with no increase in rates necessary.

The Commission has recognized the need to continue to invest in the recapitalization of the City's water and sewer infrastructure. The enhanced water main replacement program, increased levels of sewer rehabilitation and other ongoing capital needs require an increased level of transfer into the capital program. To generate funds for these future requirements, a 4.0% across-the-board water and sewer rate increase had been included in previous years although no increase was generated last fiscal year. Drafts of our Water and Sewer Master Plans have been completed and are being reviewed. In order to continue to support our "pay as you go" philosophy for funding long-range projects, a 3.0% across the board water and sewer rate increase has been adopted.

The impact of a 3% rate increase on a residential customer using 10,000 gallons of water monthly amounts to \$1.49 illustrated as follows:

3% Effect on Water and Sewer Rates

<u>5/8 inch meter</u>	<u>Old Rate</u>	<u>New Rate</u>	<u>Increase</u>
Water Fixed Charge	\$ 2.74	\$ 2.82	\$ 0.08
Water Commodity			
0-3,000 gals	0.89	0.92	0.03
4-7,000	1.53	1.58	0.05
> 8,000	2.26	2.33	0.07
Sewer Fixed Charge	3.18	3.28	0.10
Sewer Commodity			
0-3,000 gals	2.07	2.13	0.06
> 4,000	2.87	2.96	0.09

3% Effect on Average Customer (10,000 gallons/month)

<u>5/8 inch meter</u>	<u>Old Rate</u>	<u>New Rate</u>	<u>Increase</u>
Water Charge	\$18.31	\$18.89	\$ 0.58
Sewer Charge	29.48	30.39	0.91
Total	\$47.79	\$49.28	\$ 1.49

CENTRAL REGIONAL WASTEWATER SYSTEM FUND

The City of Fort Lauderdale, through Large User Agreements, operates the Central Wastewater Region to provide treatment services for Fort Lauderdale, Oakland Park, Wilton Manors, Port Everglades, and parts of Tamarac. These agreements, necessitated by federal funding requirements, establish the methodology for setting rates to large users. The City Commission establishes a billing rate based upon estimated expenses for the coming fiscal year. At the close of each fiscal year, the fund is audited and the actual rate determined. If necessary, lump sum rebates or charges are made to adjust the amounts paid during the year. In the past, the rate calculated at year end has been less than the budgeted rate resulting in rebates instead of charges.

The FY 2000/2001 operating budget for the Central Regional Wastewater System is \$7,886,687 a decrease of \$21,348 which translates to a 0.3% decrease over the FY 1999/2000 budget. The current fiscal year Large User rate will remain at \$0.77 per 1,000 gallons of wastewater treated.

STORMWATER MANAGEMENT SYSTEM FUND

The City's Stormwater Management program is entering its ninth year of operation. Revenues collected are used for operating expenses and capital improvements directly related to the management of stormwater, including improvements designed to increase water quality in the City's waterways. Stormwater capital funds were used, for example, to fund those improvements in the Executive Airport/Fiveash Wellfield area, which are directly related to water quality improvements.

The FY 2000/2001 Stormwater operating budget is \$2,251,752 a decrease of \$8,794 or 0.4% from the FY 1999/2000 budget. This decrease results from small adjustments to the operating budget. Stormwater

revenues are sufficient to meet operational commitments with no increase in rates. We believe that as our second existing swale reclamation crew gets into a normal mode of operation, an additional crew will not be needed to meet the City Commissions desire for a reduction in the backlog of swale reclamation projects.

PARKING SERVICES FUND

The City's parking system provides 9,718 parking spaces located in three parking garages and numerous parking lots as well as on-street parking. The FY 2000/2001 Parking Services operating budget is \$5,666,235 an increase of \$244,113 or 4.5% from the FY 1999/2000 budget.

New public parking will be developed under the deck area of the new 17th Street Causeway Bridge and also at Earl Lifshey Park located at the S.E. corner of Oakland Park Boulevard and A-1-A. Public parking is being explored at the former helistop and homeless sites in downtown Fort Lauderdale. In addition, spaces will be installed at the Galt Civic Center, replacing meters that were previously taken due to development.

There has been some interest expressed to partner in the development of the parking lot just north of Las Olas Blvd. between N.E. 8th and N.E. 9th Avenues.

The new BridgeSide Square development parking facility will provide 524 public parking spaces. The parking facility will be operated as an attendant facility after the first phase of construction is completed. Once final construction is completed, multi-space parking meters and the sale of monthly parking permits will then be available at this parking facility. The BridgeSide Square facility should open before the end of the calendar year 2000.

Parking Services is reorganizing its management structure and is restructuring the duties of two vacant, former Assistant Manager positions.

AIRPORT FUND

The Executive Airport Division of the Community and Economic Development Department develops, operates, promotes, and maintains Fort Lauderdale Executive Airport and Industrial Airpark, the Downtown Helistop, and the new Foreign-Trade Zone #241. The Airport is self-sustaining, with revenue generated by land leases and fuel flowage fees. The Division administers 47 land leases for both aviation-related and Industrial Airpark land on the 1,200-acre property.

Airport revenues are expected to increase by 7.7% from \$4,340,322 in FY 1999/2000 to \$4,676,866 in FY 2000/2001. Expenses are predicted to increase by \$283,030 or 7.8 % from FY 1999/2000 to \$3,945,038 in FY 2000/2001. The budget surplus will total \$632,328 or 13.5% of projected revenues available for Airport Capital Improvements. The Airport Enterprise Fund will total over \$10 million next year. Fort Lauderdale Executive Airport continues to play a key role in the City of Fort Lauderdale's economic development efforts by offering the types of facilities and amenities essential to business travelers. Executive Airport is unique in the Southeast in that it offers a 24-hour FAA Air Traffic Control Tower, an Instrument Landing System, a 6,000-foot runway, Aircraft Rescue and Fire Fighting services, U.S. Customs, 24-hour security and a police substation on the property.

This award-winning Airport is home to over 840 aircraft, including 84 jets and 42 helicopters, more than any other airport in the Southeast. Eighty-four percent of the over 9 million gallons of fuel pumped at the Airport in 1999 was jet fuel. Six Fixed Base Operators provide a full spectrum of services, including fueling, avionics, maintenance, charters, aircraft sales and leasing, and air ambulance. To help accommodate some of the pent up demand for hangar space, Airport tenants such as Holland Builders and World Jet are planning to construct approximately 215,000 square feet of new hangars this year.

A number of Capital Improvement Projects are also under development to prepare the Airport to meet the future aviation needs of the area. One of the most significant projects is the \$4 million Airfield Electrical Rehabilitation Project, which will bring the airfield electrical system and guidance signs up to current FAA standards and will enhance safety by reducing runway deviations, which have become a matter of national priority.

The Airport is also completing construction of an elevated Downtown Heliport, which will provide a vital transportation link to the City's Central Business District. The new facility will offer one landing and one parking position and a fully furnished lobby. The Heliport will be a convenient option to surface transportation for people traveling from Miami, West Palm Beach, and as far away as Orlando and Tampa.

As a means of continuing to promote economic development opportunities in the area, the entire Airport and six other sites were recently designated as Foreign-Trade Zone #241. This designation will help Airport tenants conducting international business to defer, reduce, or even eliminate costly duties or excise taxes, thus making the tenants financially stronger and more competitive.

The Airport's mission is to attract business to the area and help those businesses prosper while being a benefit to the community. As part of that mission, the Airport will kickoff its Master Plan and Part 150 Study Updates later this year. These studies will involve the efforts of the Airport tenants, the community, the Federal Aviation Administration and Florida Department of Transportation, and the City staff to set a course for the future that meets the needs of both the aviation community and the needs of the residential community.

SUNRISE KEY NEIGHBORHOOD IMPROVEMENT DISTRICT

In accordance with State Statute regarding safe neighborhood districts, the following budget is based upon a millage rate of 1 mill.

Professional Services	\$ 4,200
Security & Other Services	24,400
Vehicle Expenses	4,200
Repair and Maintenance	2,500
General/Liability Insurance	3,500
Contingencies	<u>1,200</u>
Total	\$40,000

LOOKING AHEAD

With the anticipation of eventually moving to a multi-year budgeting system, departments were asked to look ahead and identify what they should be doing over the next two years and what the future budgetary impact will be. Outlined below are areas they have specified that should be addressed.

Administrative Services

Information Technology anticipates increasing E-commerce expenditures City-wide, governed by the technology available in the marketplace and its impact to provide electronic service to the citizens and the business community. Personnel plans to begin a multi-year project interfacing a new document imaging system to the Intranet providing paperless form processing. Other areas in Personnel include the expansion of labor/management cooperative efforts, as well as the organizational development and training information.

Purchasing will continue to leverage the use of technology and the Internet to allow greater access to vendor records and purchase orders, as well as providing a full interface with the Financial Accounting Management Information System General Ledger for a budgetary impact of about \$50,000 over the next two years. Purchasing would also like to begin researching and implementing a document scanning system for the tremendous volume of paper records that must be maintained and accessible, which could cost over \$200,000. Due to a tremendous increase in the number of Request for Proposals and Request for Letters of Interest as well as increased involvement with contract negotiations, an additional buyer's position may be requested for about \$60,000.

Future Parking Services issues may include managing several multi-year projects to repair existing garage facilities; partnering with the private sector; reviewing and recommending changes to parking ordinances, rates, and fees; preparation of the Beach Moratorium Phase II study recommendations which could result in increased capital expenses; and a review of the South Beach Parking Lot operations.

The Central Services Fund anticipates enhancements to the Public Safety Radio Communications System due to the growth and development in the downtown area for an expense not to exceed \$4 million. Central Stores will continue to be a vital part of the Emergency Medical Services function. Due to the foreseeable increase in stocked items and customers served, there may be a need for an additional storekeeper or clerk.

The Vehicle Rental Fund has identified the need to monitor the Federal government's position on alternative fuel mandates which could require the purchase of higher priced alternate fuel vehicles and an expenditure of approximately \$300,000- \$500,000 for a natural gas refueling station. A long-term solution also needs to be incorporated into plans for a new operations center since the growth of the fleet is making the existing garage obsolete and inadequate.

City Attorney's Office

Further application of new technology will be needed to increase efficiencies and provide better services. This would include software for assignment tracking, speech recognition, and case management for litigation. The process of investigating these technologies and their potential costs is underway. It is anticipated that an additional Legal Secretary would be needed to keep pace with the growing workload at a cost of about \$47,000.

City Clerk's Office

Website access of agenda items and backup will be completed in FY 2001. However, the cost of maintaining the data and software upgrades may impact future budgets. Additionally, the City Clerk's budget may be impacted in the next few years by the necessity to upgrade/replace the existing audio-visual equipment used in the live production of meetings of the City Commission, CRA-Commission, and various City Advisory Boards to the citizens of Fort Lauderdale.

City Manager's Office

Administration will continue efforts to streamline the intake, transmission, and response to Commission and citizen inquiries and concerns through the increased use of technology and effective use of resources. There will be an increase in efforts to monitor legislative issues and a moving forward with a strategic planning process.

Internal Audit will step up its coverage of audits/reviews of the City's franchise fees, utility tax, and telecommunications tax areas which could recover revenues. Due to all the new technology and management use of computer programs for decision-making, the Division should secure contract services to perform audits of the City's computer environment.

Public Information will undertake two important initiatives. Marketing for the Community Redevelopment Agency will require frequent communications with the community as well as project marketing. The budgetary impact will be a need for additional resources to produce these communications. Exponentially increasing requests for communications and interaction via the Internet/Intranet will require additional resources to maintain and enhance the City's website and Intranet.

The Equal Opportunity Office will continue to increase proactive efforts in internal managerial training in the areas of equal opportunity issues and cultural diversity, enhance educational and outreach activities in the Disadvantaged Business Enterprise Program, and continue to encourage effective employment practices and the positive resolution of employment concerns.

Community and Economic Development

The wooden docks at Cooley's Landing Marina will need to be replaced at a cost of \$80,000. Community Inspections will continue to focus on and establish relationships with the community by increasing educational efforts, increasing maintenance standards, addressing enforcement efforts for waterway pollution, and interacting with neighborhood groups. Revenues relating to enforcement are expected to decline as the process moves forward. Staffing levels are expected to increase as the demands increase. With the redevelopment of the downtown becoming a priority, Community Inspections will assist through code enforcement. Additional resources will require expenditures in the range of \$200,000.

Economic Development will be building an infrastructure to provide clients with 24 hour access to information via the internet. This will consist of real estate data bases and leasing information to provide an understanding of the real estate market and business climate. It is anticipated that for every dollar spent in this manner, four dollars will be received in return.

Community and Comprehensive Planning will be working on implementation of the Community Area Planning Program for Area 2, as well as implementation of additional programs for the Urban Design Plan. There will be an expansion of programs and support to educate, empower and sustain neighborhoods.

The Airport Division will complete an update to the Airport Master Plan and the Noise Compatibility Study which will involve extensive community involvement and help set a course for the airport in the 21st century. The Foreign Trade Zone will be implemented at the Executive Airport and six other sites, requiring a consultant to assist with professionally administering and marketing the Zone. The Airport Division will also complete construction of the new Downtown Fort Lauderdale Helistop and begin operating and maintaining the facility. The Division will conduct an extensive marketing effort to promote the facility to the aviation industry and the business community. There will also be an aggressive staff effort to complete a multi-million dollar project to design and construct permanent facilities for Airport Administration, Fire-Rescue and an Emergency Operations Center. Future phases will include U.S. Customs and Airport Maintenance. This project will be paid for by Airport Division funds and Federal Department of Transportation funding.

Finance

In the next two years, implementation of Statement 34 of the Governmental Accounting Standards Board will require significant changes in how City infrastructure is accounted for and reported. Such a change will ultimately impact the presentation of budgetary and financial indicators to the City Commission. Further application of new technology within the financial activities of the City will require additional capital outlay expenditures in FY 2002.

Fire-Rescue

The Fire Prevention Bureau will begin implementation and enforcement of the new Florida Building and Fire Prevention Codes. The newly created Performance Based Public School Code may mandate certain retroactive code applications on properties throughout the City. Both of these will require additional inspection responsibilities and personnel to fulfill the legal mandates. The demand for public education programs and Explorer activities will continue to increase, requiring additional resources and alternative delivery methods. An electronic processing of inspection activities through the use of mobile field computers is expected to begin over the next two years.

Further application of new assets management technology within support services is anticipated for an additional capital outlay in the range of \$75,000.

Currently an eastern regional dispatch center is under discussion, which would enable Fort Lauderdale to provide Fire-Rescue dispatch for contiguous cities. Should this occur, there would be a need for additional dispatchers and supervisors, and any additional costs could be avoided with regional services.

In Operations, an aggressive development of technology for an Automated Vehicle Locator and field reporting of data needed by hospitals, insurance companies, and billing agents needs to proceed in order to reduce administrative overhead and resource inefficiency. This would result in a higher percentage of return on expenditures for fire-rescue services, and enable the City to keep service fees at lower levels. Additional annexation or service contract possibilities exist in the future which need to be continually focused upon in order to create additional tax base or revenue sharing possibilities.

Parks and Recreation

The FY 2000/2001 budget contains partial funding for the parks bond projects that will be completed. The following year will need to include full year's funding for these projects and funding for the remaining projects being completed in the next two years. Median maintenance of Florida Department of Transportation (FDOT) improvements will require funding in FY 2001/2002.

Police

In FY 2001/2002, approximately \$230,000 will need to be added to assume grant programs that will have ended. The Department will be developing a scheduled computer replacement plan, anticipates a continued community interest to increase police presence in the schools, and identifies that unknown annexations would significantly impact future budgets, as will addressing infrastructure and facilities needs.

Public Services

It is expected that there will be development related issues experienced in the next two years, which will not result in a reduction in development review activities but will result in a reduction in development projects that come to fruition. There will continue to be an increase in the amount of in depth analysis and review of projects due to more City Commission and zoning/development review initiatives which result in code changes. This will result in increasing workloads and expenditures.

Traffic calming needs are anticipated to continue to increase for Neighborhood Capital Improvement Projects and Business Capital Improvement Projects which will require an increase in funding.

Efforts will continue to improve infrastructure maintenance on existing facilities.
